	Designation	: **Software Developer Trainee**
	Role	: **.**Net Web Form & PHP Developer with SQL Server & My SQL
	Responsibilities	: Understanding Software Development with Industry Std.

🎓 Education

MCA IGNOU New Delhi / **2015-2017**	**PG Diploma in Advance Computing** CDAC Mumbai Mumbai / **Feb'2018-Aug'2018**	**BCA** IGNOU New Delhi / **2012-2015**

📑 Project Details

1. Transparency Reporting Services

Duration : 1 Year / **Team Size :** 6 Members / **Role :** Backend & Frontend Developer

Technology Used : ASP.Net MVC & ASP.NET Core with latest Angular 13 & React 17 & jQuery(earlier)

Roles : Backend coding using C# & Frontend development using Angular a/c to requirement specification.

Responsibilities : Produce clean efficient Code, Verify & deploy changes, Create technical docs & reporting

Project Description : I have been working parallelly into this project since I have joined the organization. This is a healthcare domain application. The theme of this project is to collect the patient's data across US & Europe. After recording the data prepare the reports. There are multiple phases or modules in this project where Service Providers, activities and other items are included. This is quite large project. This backend is developed into ASP.Net MVC and for frontend developed into JS and jQuery. Later it migrated into Angular.

2. Transparency Analytics Services

Duration : 1 Year / **Team Size :** 8 Members / **Role :** Backend & Frontend Developer

Technology Used : ASP.Net MVC & ASP.NET Core with latest Angular 13 & React 17 & jQuery(earlier)

Roles : Backend using C# .Net Core & Frontend development using Angular a/c to requirement specification.

Responsibilities : Produce clean efficient Code, Verify & deploy changes, Create technical docs & reporting

Project Description : I have been working parallelly into this project since I have joined the organization. This application is basically the part of Transparency Reporting application. This app uses the patient's data, service providers data and other item data which is provided by Transparency Reporting services then perform the analysis based on certain business conditions and helps user to prepare the report.

3. CostaCofee Express Services

Duration   : 2 months / **Team Size :** 6 Members / **Role :** Backend Developer

Technology Used : ASP.Net Core, **.**Net Web APIs & SQL Server.

Roles   : Backend development using .Net Core & Create & Consume APIs, Create SQL SPs and functions

Responsibilities   : Develop APIs to consume by Frontend developer. Meeting with Client for requirement walkthrough.

Project Description : This is quite large application. The theme of the application is to manage the request received through the Coffee machine device installed in the several areas of the city. It also provides the calculation of units of request received and multiple business scenarios.

4. Healthcare Management Information Services

Duration   : 1 Year / **Team Size :** 6 Members / **Role :** Backend & Frontend Developer

Technology Used : ASP.Net MVC, **.**Net Web APIs, HTML, CSS, jQuery, SSRS & SQL Server

Roles   : Backend dev. using C# .Net MVC & Frontend dev. Using jQuery, HTML & work on DB Side.

Responsibilities   : Backend & Frontend Development, Client communication, Technical document Preparation

Project Description : This application is developed for multi super specialty hospital. This application has multiple modules based on the facilities provided by these types of hospital to their patients. Modules including Radiology, Lab Tests, Operation Theatre, Diet Management etc. This app will provide the user to print the report on the requirement. This application can be used by Service Provider, patients and normal users to book the required services provided by the Hospital.

5. Vortex 6

Duration   : 1 Year / **Team Size :** 3 Members / **Role :** Backend & Frontend Developer

Technology Used : ASP.Net Core, **.**Net Web APIs, HTML, CSS, jQuery & SQL Server

Roles   : Backend dev. using C# .Net MVC & Frontend dev. Using jQuery, HTML & work on DB Side

Responsibilities   : Backend & Frontend Development, Client communication, Scrum meetings

Project Description : This application works to manage the certification licenses of employees of an organization. Like if an employee of any client's organizations wants to take certification from Microsoft, Cisco etc. then this application helps to provide them particular training required to qualify the certification examination. For organization perspective the organization will get rebate he falls into Platinum / Gold / Silver category for count of certification achieved by their employees. On this basis organization will get rebate when they purchase the product from Microsoft, Cisco etc. companies from whom their employees completed the certifications.
